

March 2023

Monthly Bulletins are your one-stop-shop for all last month's highlights!

Updates

The National Core Indicators-Aging and Disabilities (NCI-AD) Survey is underway! This survey is being conducted by a contracted vendor, Knowledge Services. If participants inquire about the validity of the survey, please encourage them to participate. This survey provides lawmakers and programmatic leaders with measurable information that can be used to further enhance HCBS.

Provider Reassessor Notification Portal:

- A section for the assessor's name has been added to the notification portal.
- A comment section has been added to the end of the page. This section can be used to notify the PRR Team of items such as, duplicate assessments added and case note or attachments that need to be deleted. A separate email to the PRR team is no longer necessary.

Utilizing Cyber Access

Systems & Data Reporting has identified an issue with LOC scoring if changes are made to the coding of the assessment prior to submission.

To ensure the amended coding is saved and the LOC is recalculated correctly in section T, follow the steps in the newly created "[Saving InterRAI Coding Revisions -Quick Guide](#)".

Most Important Take Aways.....!

- Click the save button  on each page after making any updates to the coding.
- Select "Yes" when asked to return to section T to recalculate LOC. This should be done each time a change is made to the coding of the assessment.
- Do NOT click "Close" in Section T. You must click the Save icon in the lower right-hand corner before exiting the InterRAI to successfully recalculate the LOC score.

Reminders

Care Plan Change Request:

Please review recent case notes for comments regarding care plan change requests. If a participant has previously requested a care plan change from our PCCP team, the request should be discussed with the participant during the annual reassessment and processed accordingly. This will ensure HCBS is meeting the needs of our participants.
