# PROVIDING ON-SITE MOBILE DENTAL SERVICES

**Enable Dental**

In collaboration with the Missouri Coalition for Oral Health, Enable Dental will be assisting in the implementation of a pilot dental telehealth (teledentistry). Program goals include improved oral health outcomes, education, cost reduction, and data collection for individuals with intellectual and developmental disabilities. This program is designed to enroll 125 individuals.

**Missouri Coalition for Oral Health**

# What to expect with Teledentistry

**Prior to visit:**
Demand Generation and Patient Intake

**Visit #1: Hygienist**
Arrive at patient's nursing home, community center or private residential home

**Assessment & Cleaning**
Collect patient's medical and dental history, capture x-rays, 3D scan, intraoral images, and documents assessment.

**Teledentistry Examination**
Dentist reviews patient's medical history, images and notes in order to provide a diagnosis

**Teledentistry Summary**
Clinical Practice Manager will contact patient's responsible party and coordinate next visit (if applicable)

**Visit #2: Dentist Treatment**
Team arrives at patient's residence. Dentist performs any accepted treatments

**Recall: Routine visits**
Our administrative team will contact patient's responsible party when the next routine appointment is scheduled
